COLDTEX

THE SPECIALIST IN COLDSTORE CLOTHING

Arjo van Tuijl

How it all began

— In 1992 Arjo van Tuijl decided to start his own business. His work experience in cold storage and freezer warehouses taught him that the range of protective clothing could be improved. Both for protection, user convenience and appearance. He started by choosing the best on the market and offering this, with the right information and top-of-the-line service, to those parties dealing with extremely cold working conditions. This business plan led to a rapid growth of the Cold Tex customer base.

Supplier and developer

— Although we offer a wide range of protective clothing and footwear, the customers want more. Both in terms of functionality and of appearance. Cold Tex is convinced that these wishes can only be met properly through customized production. Therefore Cold Tex now offers, apart from a large range of top brands, its own line of freezer wear. Together with a workshop and a work wear manufacturer, Cold Tex developed freezer clothing that meets all requirements for working under extreme circumstances.

Our motivation is wanting to be the best. Day in, day out!

In everything we do, the wishes and needs of our customers are our top priority. Whether this is compiling our wide range of protective clothing and footwear or developing a new clothing line. But we don't stop there. Because we are convinced that the combination of top quality products and top quality service is what makes the difference. And that this is why our customers continue to place their faith in Cold Tex. Day in, day out, for all those years.

Everything taken care of

— Cold Tex offers the possibility to take care of all work wear and freezer wear for you. From advice to taking measurements, from repairs to cleaning and from printing and embroidery to logistic fulfilment.

Our quality range

— The entire Cold Tex range complies with the highest standards and has the relevant EN standards for protective clothing (EN342 for cold protection, EN340 for general protection and EN471 for high visibility). Apart from a standard collection, Cold Tex offers the opportunity to develop 'custom made' freezer wear, made to the specific wishes of the customer.
